# SUBJECT INDEX FOR VOLUME 32

AIDS, and psychosocial research, 757–765
prevention, 783–791
popular attitudes in Zaire, 917–930
in Africa, 967–980
risk perception and hostility, 1137–1142
prevention, 1367–1378
(see also HIV infection)

amenorrhea, in Zaire, 343–347

anxiety, response of dental students, 229–232

asthma, and primary care for children, 65–70
racial inequalities among children, 831–836

Bamako initiative, 745–755

Bangladesh, and infant deaths, 43–49
women's health education, 959–961

Bell's palsy, 559–563

bereavement, grief resolution in hospice and hospital wards, 295–304

biopsychosocial health, 107–108

Brazil, diet and social factors in, 1229–1235

British National Health Service, 441–454

Cameroon, child mortality, 1341–1349

Canada, attitudes about Caesarean births, 1283–1289

cancer, patient care, 83–87
and coping styles, 627–632
and quality of life, 697–704
communication with patients, 725–731
factors affecting treatment, 813–818
the problem of patient under-reporting, 981–987
measuring knowledge of, 1245–1255
lung cancer among women, 1105–1110
chemotherapy refusers, 1327–1340

cardiac disease, depression and acute myocardial infarction, 1017–1027

child health, 29–34
primary care for asthmatics, 65–70
and socio-economic differences in Sweden, 403–410
in Zaire, 667–675
malnutrition in Malawi, 887–898
mothers of the chronically ill, 1291–1296
mortality in Cameroon, 1341–1349

China, aging and disability in, 649–665

Chinese medicine, 261–266

clinical decision making, 853–866

clinical research, and conflicts of value and role, 333–342
with anti-HIV drugs, 1161–1167

clinical trials and perceived benefit, 35–42

colonial Africa, pioneer medical missions, 1–10
nutrition in Tanganyika, 11–14
community care, 633–642
for AIDS, 71–76
its formulation, 909–915
screening programmes, 1269–1274
community nursing, 65–102
confidentiality, 279–286
and general practice, 153–157
coping behaviour, in Danish slaughterhouses, 15–27
cost-effectiveness, analysis of alternative treatment of kidney stones, 1401–1412

decision making, among patients, 35–42
among physicians and nurses, 166–174
in dentistry, 287–294
in clinical practice, 853–866
Denmark, job strain among slaughterhouse workers, 15–27
dentistry, treatment of anxious patients by dental students, 229–232
dental insurance, 287–294
dental decision making, 287–294
dentists' adherence to national guidelines, 1263–1268
diabetes, and self care, 689–696
doctor–patient relationship, 1301–1310
and medical knowledge, 193–196
questions and communication, 541–548, 627–632
and communication with cancer patients, 725–731
the case of infertility, 875–885
communication about death, 943–952
informed consent in Japan, 1007–1016
communication analysis, 1143–1150
donor insemination, 273–278
dracunculiasis, control, 1319–1326
drug advertising, in the Nordic countries, 465–471
for psychiatric use, 867–874
dysentery, and statistical uncertainties in India, 211–219

elderly, and home care, 77–81
and patient compliance, 89–94
mortality by social class in Sweden, 437–440
Swedish policy making, 491–497
and the care for renal disease, 565–577
and health services in China, 649–665
emergency department, health belief intervention, 1183–1189
epidemiology, 102–106
morbidity among Swedish farmers (1978–1983), 305–309
patterns in Sri Lanka, 793–804
travelling waves of AIDS, 847–852
epilepsy, and public attitudes in central Ethiopia, 203–209
Equador, primary health services, 1327–1336
Ethiopia, and mental illness, 197–201
attitude towards epilepsy, 203–209

family support, and terminal care, 95–102
France, its pain centres, 353–354
the health of migrants, 1219–1227

gender, and depression, 127–140
and health inequality, 359–365
and health status, 425–436
drug advertising in Scandinavia, 465–471
and health behaviour, 579–590
variations in smoking patterns, 989–1005
health differences on the kibbutz, 1089–1096
variations in patterns of doctor–patient communications, 1143–1150
differences in career patterns among Israeli physicians, 1169–1181
general practice, and confidentiality, 153–157, 279–286
and job satisfaction, 1111–1119
Great Britain, sexual liberalization and AIDS prevention, 783–791
Greece, and thalassemia, 59–64
Guatemala, knowledge about onchocerciasis, 1275–1281

handicap, problems in Senegal, 267–272
in the welfare state, 517–524
user satisfaction with physical devices, 1417–1424
health behaviour, and gender, 579–590
health beliefs, of thalassemia in Greece, 59–64
evaluation in Norway, 141–146
understanding common health terms, 193–196
adolescents' perception of risk for HIV infection, 221–228
and behaviour change, 311–320
and menstrual attitudes in India, 349–351
and AIDS, 677–681
and mammography, 733–741
about AIDS in Zaire, 917–930
and patient compliance, 1183–1189
of cancer, 1245–1255
in Guatemala, 1275–1281
among Nigerian parents, 1379–1387
health care, in Cape Town council hostels, 117–128
organisation and delivery of services, 441–524
and the informal sector, 507–515
and disablement, 517–524
and distributive justice, 565–577
for the aging and disabled in China, 649–665
establishing priorities, 773–781
and rapid appraisal, 909–915
the Zimbabwean system, 1079–1088
of the poor, 1097–1103
the influence of job satisfaction among GPs, 1111–1119
and doctor–patient communication, 1301–1310
health care services, organisation, management and delivery, 441–524
community versus hospital, 483–489
opinions of utilizers in India, 1389–1392
health education, in rural Bangladesh, 959–961
health inequalities, 359–440
comparative admission rates for child asthmatics in New Zealand, 831–836

in Zimbabwean health care, 1079–1088
among migrants in France, 1219–1227
health prevention, the role of medical anthropologists, 1269–1274
prostitution and AIDS, 1367–1378
health service resources, and infant deaths in Bangladesh, 43–49
immunization in Senegal, 249–259
health status, 1413–1416
health workers, in rural Papua New Guinea, 159–165
HIV infection, and community care, 71–76
and male prostitutes, 535–539
perceptions of risk, 221–228
and homosexual men, 683–688
heroin and heterosexual relations, 1037–1050
and clinical trials, 1161–1167
(see also AIDS)
Holland, confidentiality in general practice, 153–157
homosexuality, and HIV in men, 683–688
hospice movement, patient and family needs, 83–87
comparisons with conventional care, 147–152
and grief resolution, 295–304
diffusion patterns, 847–852
and communications about death, 943–952

immunization, in Senegal, 249–259
India, and dysentery, 211–219
health beliefs, 349–351
informed consent in, 1389–1392
infant mortality, in Bangladesh, 43–49
infertility, problems posed for the doctor–patient relationship, 1875–1885
influenza, Nigerian pandemic, 1393–1399
Israel, life events and gender differences, 1089–1096
gender differences in physician careers, 1169–1181

Japan, and informed consent, 1007–1016

Laos, psychiatric disorder among refugees, 1029–1036
leukaemia, and farm practices, 1067–1073
life style, 899–908

Malawi, national sample surveys for nutritional surveillance, 887–898
malnutrition, and traditional beliefs in Pakistan, 175–191
and surveys in Malawi, 887–898
medical career choice, and clinical experience, 327–332
medical education, and clinical experience, 327–332
medical ethics, 591–599
and the research ethics, 333–342
the case of Bell's palsy, 559–563
and doctor–patient communication, 725–731
informed consent in India, 1389–1392
medical library services, 51–57
medical missions, in colonial Africa, 1–10

mental health, and depression among women, 127–140
in rural Ethiopia, 197–201
among mothers of unwanted babies, 241–247
community versus hospital care, 483–489
Swedish services, 499–506
the use of pejorative terminology, 623
the self-help movement among former mental patients, 1121–1128
and sleep patterns, 1237–1243
migrants, health in France, 1219–1227
mobidity, the problem of flawed data, 211–219
and mortality patterns in the Netherlands (1981–1985), 1129–1136

narative analysis, among AIDS patients, 757–765
Netherlands, culture shock among children, 29–34
health expectancy (1981–1985), 1129–1136
New Zealand, comparative admission rates among young asthmatics, 831–836
Nigeria, disease control, 1319–1326
rural health in, 1351–1360
beliefs about childhood diseases, 1379–1387
influenza (1918–1919), 1393–1399
Norway, and concepts of health, 141–146
modern and traditional medicine in, 549–552
nursing, and compliance among the elderly, 89–94
among HIV patients, 71–76
and understanding common health terms, 193–196
and decision making, 167–174
and appraisal systems, 553–558
occupational stress among psychiatric staff, 819–830
nutrition, in colonial Tanganyika, 11–14

obstetrics, training programme for midwives, 931-942
Canadian attitudes and practices, 1283–1289
occupational health, 15–27
among women, 805–811
stress among psychiatric nurses, 819–830
work organization and smoking behaviour, 837–846
psychosocial variation among employees, 1051–1056
dangers of pesticide exposure, 1067–1073
clerical workers and maternity, 1425–1433
occupational prestige, variations across medical specialties, 321–326
onchocerciasis, in Guatemala, 1275–1281

pain, and repetition strain injury (RSI), 601–612
ethnic variations, 1063–1066
pain centres, in France, 353–354
Pakistan, traditional perceptions of malnutrition, 175–191
Papua New Guinea, and rural health workers, 159–165
and the train of midwives, 613–618
parasitology, guineaworm control, 1319–1326
onchoceriasis, 1275–1281
patients' decision making, and clinical trials, 35–42
pharmaceuticals, the supply of essential drugs in Africa, 1201–1218
post-menstrual stress, 525-534

pregnancy, mental health and the unwanted baby, 241-247
delayed ante-natal care, 715–723
preventive medicine, factors in mammography participation, 733–741
cervical screening in London, 953–957
dracunculiasis immunisation programme in Nigeria, 1319–1326
primary health care, 89–94
and library services, 51–57
for asthmatic children, 65–70
in Equador, 1327–1336
professional power, 643–648
prostitution, and AIDS infection, 535–539
AIDS and preventive behaviour, 1367–1378
public health medicine, 103–106

quality of life, bone marrow transplantation, 697–704
among cancer patients, 981–987, 1337–1340

refugees, and psychiatric disorder, 1029–1036
religion, and stress, 1257–1262
renal disease, and the elderly, 565–577
treatment costs, 1401–1412
repetition strain injury, 601–612

self-help, its politics among former mental patients, 1121–1128
self-help groups, and ethical issues, 591–599
and diabetes, 689–696
home monitoring, 1057–1061
Senegal, its immunisation campaign, 249–259
handicapped in, 267–272
serum lipids, in urban Brazil, 1229–1235
sexual behaviour, male prostitution and AIDS, 535–539
male sexuality and AIDS, 683–688
and AIDS prevention, 783–791
drugs and HIV, 1037-1050
sleep, and psychological position, 1237–1243
smoking, 623–624, 837–846
in Sweden, 619–622
gender differences, 989–1005
and socio-economic status among women with lung cancer, 1105–1110
and life expectancy in the United States, 1151–1159
and occupation, 1297–1300
social class, and health inequality, 359–439
social networks, 767–771
among the elderly, 77–81
and welfare, 507–515
social support, among the chronically ill, 705–714
South Africa, and health care strategies, 117–126
Soviet medicine, 109–110
Sri Lanka, health on the tea estates, 793–804
stress, life events and sleep, 1237–1243
and religion, 1257–1262
suicide, and fire arms in the United States, 1311–1313

Sweden, agricultural morbidity (1978–1983), 305–309
and health inequality, 385–393
socio-economic differences in child mortality, 403–410
unemployment and mortality, 419–423
mortality among the elderly, 437–440
the very old and ideas of the welfare state, 445–464
health policy, 473–481
and health policy, 491–497
and the mental health system, 499–506
smoking in, 619–622

Tanganyika, and nutrition, 11–14
teratogenicity, as a health risk, 1191–1198
terminal care, 83–87, 147–152, 943–952
and family relationships, 95–102
thalassemia, in Greece, 59–64
Third World, 745–755
traditional health beliefs, in Pakistan, 175–191
traditional medicine, in China, 261–266
in Norway, 549–551
Cree Indian practices, 1361–1366
tranquillisers, and health care, 449–454

unemployment, and mortality in Sweden (1980–1986), 419–424
United States of America, confidentiality in general practice, 153–157
life expectancy among cigarette smokers, 1151–1159
suicide and fire arms, 1311–1313

women's health, the case of depression, 127–140
depression and unwanted births, 241–247
and the menstrual cycle, 525–534
training programmes for midwives, 613–618
delayed antenatal care, 715–723
attitudes towards mammography, 733–741
and domestic roles, 805–811
treatment decisions in breast cancer, 813–818
and midwifery training programmes, 931–942
education in Bangladesh, 959–961
lung cancer mortality, 1105–1110
obstetrical attitudes and practices in Canada, 1283–1289
maternal role of clerical workers, 1425–1433

Zaire, post-partem abstinence, 343–347
health programmes in, 667–675
popular belief about AIDS, 917–930
Zimbabwe, health care equity, 1079–1088

| LE | Letter to the Editor |
| RN | Research Note |

## Information for Contributors

Manuscripts for review (including long research reports) should be sent, in triplicate, directly to the Editor-in-Chief or to the relevant Senior Editor and will be published within 6 months (or less) of acceptance. Inquiries regarding the publication of symposia should be sent to the Editor-in-Chief.

Page proofs will be sent to the corresponding author for checking. **Corrections to the proofs must be restricted to printer's errors.** Any substantial alterations other than these may be charged to the author.

Authors are particularly requested to return their corrected proofs as quickly as possible in order to facilitate rapid publication. Please note that authors are urged to check their proofs carefully before return, since late corrections cannot be guaranteed for inclusion in the printed journal.

## Beyond the Anglophone World

Contributions, which should be informative rather than critical, summarising rather than reviewing, should be submitted in duplicate to either of the responsible editors. Contributions in Dutch, French, German, Polish, Scandinavian or Spanish will be welcome, although English material can be more quickly processed.

## Style of Manuscript

*General Form*: Manuscripts should be typewritten on one side of the paper only, with double spacing and liberal margins. Manuscripts should be submitted *in triplicate*, i.e. an original and two carbon copies. The title page must state the name and address of the authors to whom all correspondence and proofs should be addressed. In the absence of such information, correspondence and proofs will be sent to the first named author. Where possible, the **Fax number of the corresponding author** should be supplied with the manuscript, for use by the publisher. **A short title of not more than 45 letters and spaces should be supplied.** The manuscript and diagrams will be discarded one month after publication unless the publisher is requested to return the original material to the author.

*Abstract*: A short abstract (not exceeding 400 words) must accompany the manuscript on a separate sheet.

*Key Words*: Authors should indicate immediately below the abstract, about 4 key words that identify the main topics in their paper. Authors of papers in French, German or Spanish should also give the equivalent key words in English.

*References*: References should be cited in the text as consecutive, bracketed numerals and the list placed at the end of the article (not as footnotes on each page) in numerical sequence. The list should include the author's last name, initials, title of article in the original language, name of periodical abbreviated in the style of the *World List of Scientific Periodicals* (4th edition), with volume, page and year. For example:

1. Proshansky H. M., Ittelson W. and Rivlin L. G. Freedom of choice and behaviour in a physical setting. In *Environmental Psychology: Man and His Physical Setting* (Edited by Proshansky H. M. *et al.*), p. 127. Holt, Rinehart & Winston, New York, 1970.
2. Willie C. V. The social class of patients that public health nurses prefer to serve. *Am. J. publ. Hlth* **50**, 1126, 1960.

Should the author be uncertain of the acceptable abbreviation he should quote the Publication name in full in the order and manner shown above in (2). Where a reference relates to the text more than once, second and subsequent entries should give the initial reference number followed by the relevant page(s). The use of such terms as '*ibid*' and '*op. cit.*' should be avoided.

*Illustrations:* Illustrations and tables accompanying manuscripts should be numbered, provided with suitable legends, and marked lightly on the back with the author's name. Figures and tables may now be reproduced directly by photo-offset methods. For guidance on how best to prepare figures and tables suitable for direct reproduction, please consult the photoreprographic department of your institution which will give you assistance. Authors should indicate on the manuscript the appropriate positions of tables and text figures. A reasonable number of half-tone illustrations will be reproduced free of cost to the author, but special arrangements must be made with the Editor for colour plates, elaborate tables, or extra illustrations. Copy for line illustrations (such as pen drawings and charts) must be drawn and lettered in India ink, or black typewriter ribbon may be used for lettering. Should Greek letters or mathematical symbols be required in a table it is better, if you do not have the appropriate typewriter symbols, to indicate what is required in pencil in the margins rather than to write by hand onto copy which could otherwise be directly reproduced. Only good glossy photographic prints should be supplied for half-tone work; original drawings, not photographs of them, should accompany the manuscripts.

*Publication Languages:* English, French, German or Spanish.

## Refereeing Procedure

To ensure fairness, each manuscript will be assessed anonymously by at least two independent reviewers. Constructive criticism provided by the assessors will be forwarded to the author.

## Reprints

Reprints and copies of the issue (at a specially reduced rate) can be ordered on the form which will accompany the proofs. These should be returned to: Pergamon Press Ltd, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England. The corresponding author of each paper will receive 25 reprints free of charge.

*Typeset in Great Britain by BPCC Techset Ltd, Exeter. Printed by BPCC Wheatons Ltd, Exeter*
